

ECM CURRENT SWITCH

Our ECM Current Switch, **RIBXGTA-ECM**, is designed to sense the increasingly low current consumption of ECM units. This ensures that an accurate status feedback of the ECM unit is transmitted back to the controller.

FEATURES

- Low **0.25 Amp** adjustable threshold
- Sense loads up to **150 Amps**
- Requires no external power supply
- Normally open (N/O) contact output
- Prepackaged
- Self-contained - No external device needed for setup
- Can be used in any application with lower than average current consumption

Ratcheting clamp tightens around wire

Foot mounting insert included

Slide opening helps with installation in small spaces
